Frequently asked Questions.....

Q: What is a Spring Top Marquee?

A Spring Top Marquee is a joinable, framed marquee that has a centre pole held up by guide wires, so there is no center-pole in the way, great! The Marquee can be erected on hardtop surfaces such as tar seal or concrete but also lawn.

Q: What is a traditional Peg and Pole Marquee?

A traditional Peg and Pole Marquee can only be erected on lawn, also tensioners and straps bracing will hold up the structure, centre and additional poles are internal and reach right to the ground.

Q: Can I join the Marquee together or to my building?

The answer is yes, we offer a unique joining system. To join a Marquee to a building needs some modification or temporary fixture on the building.

Q: How many people can I entertain in a Marquee?

Please follow the recommendations on the capacity appendix (p.2)

Q: Do I need a building permit for my Marquee?

For larger events such as a Music gig, weddings in public accessible domains or parks a permit is required. It will be the hirer's responsibility to obtain a permit before any structure is erected. But don't worry, against some charge we can arrange this part for you and take the difficulty out of this crucial safety issue. Please bear on mind, this is for your own safety.

Q: What do I do if the weather turns absolute custard?

Your event may clash with a very unlucky weather pattern. Please plan your Marquee wedding with a worst case scenario back up, like a community hall or Club House. However, we have successful supported events with winds peaking up to 120 km/h the day before the wedding and all turned out to be a great wedding.

Q: How about fireworks and bonfires?

You need to know, there is a ban on fireworks in and 500m around the Marquee, on bonfires 100 meters. The hirer is fully reliable for any damage caused in objection to these rules.
